SUMMARY

DevOps/SRE Engineer with 2+ years of experience building scalable and highly available systems on AWS and Azure. Skilled in Kubernetes, CI/CD, and infrastructure as code. Focused on observability and automation.

SKILLS

- **Cloud:** AWS, Azure
- **CI/CD:** Jenkins, ArgoCD, GitHub Actions, CodePipeline
- **Containerization & Orchestration:** Kubernetes, Docker, Helm
- **Infrastructure as Code (IaC):** Terraform, Ansible
- **Observability:** Prometheus, Grafana, New Relic, CloudWatch
- **Systems:** Linux, Networking, Distributed Systems
- **Architecture:** Microservices, High Availability, Fault Tolerance
- **Languages & Scripting:** Python, Java, Bash

WORK EXPERIENCE

DevOps Engineer

Dec 2023 – Present

Intuitive.Cloud

◦ Outsourced as Platform Engineer at Thomson Reuters

- Deployed indirect tax calculation microservices on **Kubernetes** clusters using **Helm**, enabling **scalable, fault-tolerant, and highly available systems** across environments via **CI/CD pipelines**, and architected a **multi-layer observability stack** for proactive alerting.
- Automated workflows following **GitOps** practices using **GitHub Actions** for building custom Docker images, and built authentication for secure image access to **Amazon ECR** using **AWS Cognito**.

◦ Site Reliability Engineer (SRE) in Cloud Managed Services Team

- Applied **SRE** practices including **24x7 on-call production support, incident management, root cause analysis (RCA)**, and proactive reliability improvements, ensuring adherence to **SLA/SLO** targets and improving system stability in a **high-availability distributed environment**.
- Designed a monitoring solution leveraging **New Relic** for enhanced observability across **30+ accounts**.
- Automated alerting using **CloudWatch, EventBridge, CloudTrail, Lambda**, aligned with **SLI/SLO** and proactive incident management.
- Built hybrid monitoring with **Azure Monitor**, ensuring **high availability** across environments.
- Processed **10+ TB/day** structured and unstructured data using **AWS Glue** and ETL pipelines for real-time analytics.
- Built querying system using **AWS Athena, AWS Lambda, API Gateway**, reducing **MTTR** and improving debugging efficiency.

Cloud Engineer Intern

May 2023 – Jun 2023

Mactores Innovation

◦ High-Availability CI/CD Pipeline in AWS

- Implemented a resilient **CI/CD pipeline** using **AWS CodePipeline, CodeBuild, and GitHub Actions**, ensuring **99.95% uptime**.

DevOps Intern

May 2022 – May 2023

Motorola Solutions

◦ Scalable Logging and Monitoring with ELK Stack

- Built centralized **logging and monitoring system** using **ELK Stack** and **Docker**, improving observability and debugging efficiency.

PROJECTS AND BLOGS

- **Other Projects** [\[Github\]](#)
 - Configured a **CI/CD pipeline** integrating **Jenkins, GitHub Actions, and Argo CD** for automated **Kubernetes deployments**.
- **Blogs** [\[Medium\]](#)

EDUCATION

2020 – 2024 **B. Tech in Computer Engineering**

GPA: 9.55

Charotar University of Science and Technology

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) — Nov 2024 – Nov 2026
- AWS Solutions Architect Associate — Jun 2023 – Jun 2026
- [Additional Certifications](#)
